Private Label Electrodes

Electrode Anatomy

STAINLESS SNAP

Stainless steel snap stops corrosion from occurring, eliminating artifact in the tracing. Contains a Silver / Silver Chloride sensor.

SUBSTRATE

Our foam electrodes are 1/16" (1.58mm) thick - nearly double the thickness of other manufacturers. Vermed Electrodes provide more strength and less stretch during placement.

WET GEL

Our wet gel electrodes come in a variety of chloride levels. 1% chloride content ensures an electrode that is gentler on skin while 10% allows for quicker and more reliable traces.

LIFT TAB

Lift tabs allow for easy application and removal of electrodes. Apply tabs facing South to ensure longer wear as perspiration will drop down and around tab.

STANDARD OPTIONS | Many custom options available upon request

GEL OPTIONS

Solid Gel Wet Gel

SNAP OPTIONS

Stainless Steel Carbon Filled

ALL MATERIALS

Not made with natural rubber latex

SUBSTRATE OPTIONS

Foam Electrodes

1/16" Polyethylene Foam

Cloth Electrodes

Spunlace Non-Woven Fabric

Tape Electrodes

Polyolefin Tape

Vinyl Electrodes

Vinyl Tape

CUSTOM LABEL

The label allows you to display your unique brand name and logo on each individual electrode. The strip label also makes sure the snap is firmly held in place on the electrode.

CARBON SNAP

Our Carbon snaps are MR Conditional. It can be worn during MRI Scans, but not actively in use. Radiolucent and contains a Silver / Silver Chloride sensor.

ADHESIVE

Our adhesive material is made from a medical grade acrylic - ensuring that your electrodes stay in place. Larger electrodes allow for an increase in adhesion.

SOLID GEL

Solid gel is filled in at the depth of the foam to allow for smooth, flat application. Solid gel aids in the adhesion of the electrode and does not require clean up after use.

DIE LINE

Large selection of die lines currently available with additional configurations, shapes, and sizes upon request.

Pre-Wired

- Designed specifically for infant and pediatric use
- Soft cloth material available in various sizes
- Available in both metallic and radiolucent lead wires

Tabs

- Proprietary adhesive solid gel for optimal adhesion
- Patented traction liner prevents tabs from sliding off the liner
- Unique liner card ensures ease of removal and application to patient
- Pliable substrate conforms to the body
